surface tension | Dual arcade coffee table

Flick the switch underneath, slide open the drawers and you're away. Dual is our plug and play arcade coffee table, offering you a simple menu to navigate the 60 arcade games installed.

Genuine arcade joysticks and buttons provide the hands-on interface, integrated into black aluminium control panels.

The sound is discreetly supplied from speakers mounted into the legs and finished with coordinated speaker cloth, with the volume control within easy reach. When it's time to stop, just flick the switch again, slide the drawers back in and you're done. The toughened, tinted glass will keep the rest under wraps.

These pieces of furniture are handmade by our awesome cabinetmaker. Finished in American black walnut veeneer with black gloss centre.

Designed, manufactured and assembled in the UK. We ship worldwide, fully assembled and configured to your voltage supply.
