

surface tension | Retrograde upright arcade

Our refined stand-up arcade machine. Veneered side panels in macassar ebony and walnut as standard, with black centre from top to toe.

Starting at the top, you've got the backlit marquee with a pair of flush-mounted tweeters nestled underneath. Then comes the toughened, tinted glass that covers the 24" LCD. This leads down to the control panel, with all black components in keep with the central flow. The woofers sit in the front face, overlaid with acoustic cloth. The panel nearest the floor lifts up and lights up to give you access to the computer as well as some storage for your stuff.

Drawing inspiration from the classic Taito cabinet, Retrograde was designed with a laid-back look. The screen positioned at an angle, plus a slight slant on the control panel makes it easier on those long competitive sessions. With the control panel at 65cm wide, stand shoulder-to-shoulder with your enemy as you battle it out.

The discreet speaker design more than holds its own when it comes to audio. But it's also *discrete* with the tweeters under the marquee and the woofers front centre, focused on the players to get you right in the mood for some button bashing. When it's time to take a rest, log in to Spotify and turn up the volume. Or hook up via HDMI and connect to Netflix for video streaming to your TV in 1080p. Retrograde is the best piece of furniture you could have when you've got a few friends over. We can also install a Sonos module so your arcade system can join your existing Sonos network.

Manufactured in the UK and just like our arcade coffee tables, this upright arcade cabinet is a rock-solid, serious piece of furniture. We ship worldwide, fully assembled and configured to your voltage supply.

Dimensions

Height: 1.7m
Width: 0.7m
Depth: 0.6m

Materials

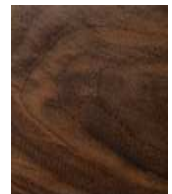

Macassar ebony or American black walnut sides (custom finishes available)

More arcade games

Your surface tension arcade cabinet is not limited to the games that come pre-installed. Because it is MAME-compatible you can add whatever retro arcade games you like. Plus the GameEx front-end makes that simple.

More retro-gaming

We all know that retro-gaming wasn't just arcades. The GameEx front-end makes it easy for you to add older console and home-computer systems too.

Indie games

If you're a fan of indie games, you can set up your cabinet to play games from online outlets such as Steam.

RRP

Prices start from around £2400 (excluding UK VAT)
